PROJECTS

HopStarter — *Ruby on Rails, React/Redux* [GitHub](#) | [Live](#)

A full-stack single-page web application. Inspired by Kickstarter.

- DRY and scalable code by multi-purposed React components.
- ActiveRecord and jBuilder to prefetch data in JSON and mitigate redundant database queries.

L-system Fractal Tree — *JavaScript, HTML* [GitHub](#) | [Live](#)

A visual representation of algorithmic botany.

- Interactive demo of drawing a natural-looking fractal tree, using HTML5 canvas.
- Examples of strings generated by an L-system and how they are translated to simulate the growth process of the tree.

j-léger — *JavaScript* [GitHub](#)

A lightweight vanilla JavaScript DOM manipulation library.

- Various DOM node manipulation / traversal methods, using the native DOM API.
